## PORT LIMAN (LAKE SUKHOI) /sic; SUKHOY LIMAN?/ /Numbers refer to attachment/

- 1. Landfall
- 2. Entrance of approach canal to PORT LIMAN

width: about 40 meters

length: about one mile

depth: surely over 21 feet

- 3. Two buoys, flashing white light
- 4. Two buoys, flashing red light
- 5. Dredge
- 6. Range; center of canal; two steady white lights
- 7. Quay; masonry apron

Length: about 300 meters; possible to tie up two 90-meter

freighters

a Soviet motorship of

and one (Yugoslav freighter Pudgora) 110-115 meters

in length; however, the bow of the latter ship extended beyond the

facing. The area is poorly lighted. There is a drinking water

outlet at some undetermined point.

- 8. Fourteen 10-ton electric cranes, each on rails.
- 9. Two sets of railroad tracks; one track running under the cranes and the other running between the coal piles and the cranes.
- 10. Street leading to a KKW group of new buildings; poorly lighted.
- II. Group of a few buildings, almost all used for housing; one building in the square used for offices and housing the INFLOT offices, the Customs offices, and the Police offices; poorly illuminated.

The position of this office building is approximate.

In addition to the dredge (5), there were also four tugs of about 1,500 horsepower.

A - PORT OF SUKHOY LIMAN	
Information concerning the port. Refer to attached sketch No. 1.	
(C-1) 1 - Quaying work under way from la to lb. The quay being const	ructed
will be about 350-400 meters long, and the depth in that area will be	about
30 feet.	
2 - There are three sets of tracks on the quay for the railroad	l cars
which generally transport coal.	
3 - There are 19 cranes of about 5 tons each in the area, inter	ıded
for loading and unloading coal.	
4 - There is a sunken vessel at this point, and in the vicinity	r is
a floating crane engaged in removing the wreck.	
5 - Port entrance.	
6 - Buoys marking the entrance channel.	
7 - There is a floating dock of about 10,000 tons without ident	t <b>ifyi</b> ng
markings at this point.	
Note: there are five suction dredges [	·J <sup>50X1-HU</sup>
dredging inside the port. The work, which is being performed by civil	Lian
workers, proceeds at a fast pace.	<sub>∍</sub> 50X1-HU

Sanitized Copy Approved for Release 2010/08/17: CIA-RDP80T00246A055300020001-5 50X1-HUM A - INFORMATION AND REMARKS CONCERNING NAVIGATION 50X1-HUM 1 - Naval vessels encountered Small motor patrol vessels Two of these vessels are permanently stationed near the sunken wreck located a little over one and a half mile southwest of Cape Panajya. a foreign ship a appears, one of the vessels immediately sets on its wake some 20 meters astern and follows it to the pilot's buoy. At that place, if the ship x immediately picks up the pilot and keeps on going, the vessel returns to its post; otherwise it anchors nearby and remains there for the time of the wait. If night falls in the meantime, the vessel will use the small searchlight every so often to sweep the water around the anchoring place of the ship and the ship itself. Other than the aforementioned motor patrol vessels, four others were described as minesweepers because of the equipment 50X1-HUM they all had installed astern. They were of small tonnage and were equipped with radar. Two of them had machine gun placed on the forecastle, while the other two had a tube running from the stem down the sides, midway between the bulwark and the surface of the water, to the stern. 50X1-HUM 2 - Comments on the coastline Halfway up a hill which is in back of the village of Kapkani, 50X1-HUM and in the vicinity of a field of what appears to be a farm 50X1-HUM 50X1-HUM
